This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

U. S. DEPARTMENT OF AGRICULTURE,
OFFICE OF EXPERIMENT STATIONS,
Washington, D. C., December 1, 1906.

SIR: I have the honor to transmit herewith manuscript of a bulletin containing the organization lists of agricultural colleges and experiment stations in the United States. The matter has been compiled under my direction by Miss M. T. Spethmann and Miss Mary A. Agnew of this Office, and I recommend its publication as Bulletin 176.

Respectfully,

A. C. TRUE,
Director.

Hon. JAMES WILSON,
Secretary of Agriculture.

COURSES OF STUDY.

The courses of study are five, each requiring four years in addition to two years of preparatory work, and each leading to the degree of B. S.: The agricultural course, the mechanical engineering course, the irrigation and civil engineering course, the general and domestic science course, and the horticultural course. Provision is made for post-graduate work. The degrees of M. S., C. E., and M. E. are conferred upon those worthy of holding them by faculty action approved by the governing board. An agricultural course, a course in domestic science and agriculture, and a normal course in domestic science, each covering a period of two years, are established, entrance to which requires the same qualifications as for admission to the freshman class; no degree is given. Short winter courses in practical agriculture, horticulture, domestic science, and forestry are also offered.

COURSES OF STUDY.

The courses of study are fourteen, requiring four years for completion. The five courses in agriculture (agronomy, dairying, animal husbandry, horticulture, and science and agriculture) lead to the degree of B. S. A.; the course in veterinary science, to the degree of D. V. M.; the course in mechanical engineering, to the degree of B. M. E.; the course in civil engineering, to the degree of B. C. E.; the course in electrical engineering, to the degree of B. S. in E. E.; the course in mining engineering, to the degree of B. S. in Min. E.; the course in ceramics, to the degree of B. E. M. in Cer.; the course in science as related to the industries, to the degree of B. S.; the course in general and domestic science for women, to the degree of B. S., and the course in domestic science for women, to the degree of B. D. S. A one-year graduate course in agricultural engineering leads to the degree of B. A. E. There are also two-year courses in mining and clay working, a one-year course in dairying, and short winter courses in stock and grain judging, dairying, and domestic science.

COURSES OF STUDY.

There are seven regular courses of study, each requiring four years for completion, viz, general science, agriculture, domestic science, mechanical engineering, electrical engineering, architecture, and veterinary science. The first six lead to the degree of B. S. and the seventh to the degree of D. V. M. Four short courses—domestic science, requiring two terms of twelve weeks; farmers' courses, requiring two winter terms of ten weeks, and dairy and farm dairy courses, requiring ten weeks each, are also offered. The degree of M. S. is given upon postgraduate study after two years, one of which must be resident.

COURSES OF STUDY.

Among the numerous courses of study offered by the university is one which leads to the degree of bachelor of the science of agriculture. This course requires four years, and during the last two years the student selects most of his studies in work given by the departments of the college of agriculture. Postgraduate courses leading to advanced degrees are provided. The following opportunities are also offered: General agricultural special work, and nature-study special course, one or two years; winter courses of eleven weeks in agriculture, poultry husbandry, horticulture, dairy industry and home economics; reading courses for farmers and farmers' wives; and nature-study correspondence work.

COURSES OF STUDY.

The long course requires four years, leading to the degree of B. S. The short course covers two terms of fourteen weeks each. A certificate is granted to those completing the course. The winter dairy course lasts twelve weeks, and requires for admission

six months' previous training in a creamery or cheese factory. A summer dairy course is offered to a limited number of students, who will be admitted without previous factory training and may remain the whole season. To secure a dairy certificate the student must have two seasons' actual practice in a factory, one of which must follow his work at the dairy school. A two-week farmers' course, limited strictly to persons who are at least twenty-five years of age, is also offered.
